KB220US Sweex Wireless Keyboard & Optical Mouse 2.4 GHz

- Do not expose the Sweex Wireless Keyboard & Optical Mouse 2.4GHz to extreme temperatures. Do not place the device in direct sun light or close to heating elements.
- Do not use in extremely dusty or moist environments.
- Prevent hard shocks or impacts of the device, as this can cause damage to the internal electronics.
- Never try to open the device yourself, this voids the warranty.

Installing

1. Place the batteries in the mouse and keyboard.
2. Place the USB dongle in a USB port of the computer.
3. Windows will automatically install the mouse and keyboard.

Connecting

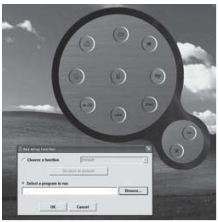
1. Press the [Connect] button on the USB dongle.
2. Press the [Connect] button on the bottom of the mouse.
3. Press the button on the bottom of the keyboard.

You can now use the mouse and keyboard.

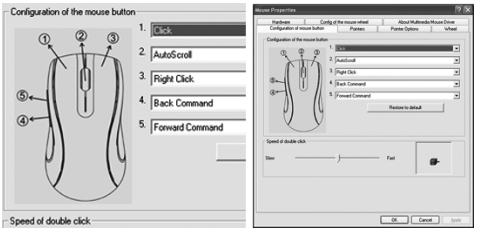
Programming buttons

To program and configure the buttons of the mouse and keyboard you first have to install the software on the CD-ROM. Place the Sweex CD-ROM in the computer. It will start automatically. Choose “Software”.

Follow the procedure to install the software and reboot the computer when asked. To start the software there are 2 icons at the bottom right of your screen. Press the mouse icon to configure the mouse and the keyboard icon to configure the keyboard.



Keyboard settings. Press on an icon to configure the designated button.



Mouse settings

Be aware that when the mouse is not used for a period of time it will go in to hibernation mode. To re-activate the mouse press one of the mouse buttons once.
To indicate that the batteries of the mouse are almost empty a red light on the bottom of the mouse will blink fast.

Warranty

For all Sweex products a warranty period of 3 years applies. We do not give support or warranty on supplied software, rechargeable batteries and batteries. Transaction of warranty only takes place at the sales point where the product is bought.

All brand names and associated rights mentioned in this manual are and stay property of the rightful owner.
